Claude.ai, OpenAI

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Ethink Solutions Australia (Work From Home) *June 2018 – Present*

- **Project Delivery & Ownership:** Led the end-to-end delivery of complex web and mobile solutions for diverse industries (transport, healthcare, fumigation), ensuring alignment with scope, quality, and customer satisfaction.
- **Technical Solution Design (LCNC):** Architected and developed scalable, multi-tier applications using **AwareIM Low-Code platform** as the backend, integrated with **Flutter** for high-performance mobile and web frontends.
- **Systems Integration:** Implemented seamless data flow and system interoperability by expertly managing **REST, SOAP APIs, and JSON** for integrating LCNC solutions with external enterprise systems.
- **Workflow Automation:** Designed and deployed critical business process automation within LCNC platforms, significantly improving operational efficiency for clients.
- **Customer Engagement:** Actively participated in requirements gathering and translated complex user needs into actionable technical specifications and high-quality software solutions.
- **Key Projects:** GoCargoFr8, GoFumig8, GoIOT, MyCare and many more.

Software Engineer

Softserv Solutions Pvt Ltd, Jaipur, India *June 2016 – June 2018*

- **Solution Design & Development:** Took full ownership of design, development, testing, and debugging for web-based solutions across multiple domains, including coal mining, healthcare, and car rental services.
- **Global Team Management:** Managed and collaborated with a diverse offshore team, ensuring project milestones were met and technical standards were maintained.
- **Client Communication & Analysis:** Demonstrated strong proficiency in client interaction, effectively gathering requirements, conducting system analysis, and finalizing technical and functional specifications.
- **Data Architecture:** Gained extensive expertise in mastering SQL intricacies while developing comprehensive digital repositories for clients (e.g., Cook Colliery data management).
- **Key Projects:** Project Cook (Coal Mining), HFDC (Hawaii Family Dental Centre), LYFT (USA), Humm Kombucha. (Technologies: Tomcat, AWS, AwareIM Low Code, MySQL/MS-SQL).

EDUCATION

Bachelor of Technology in Computer Science

Pratap University | Jaipur, India *Graduated: May 2016*
